

Current Concepts in the Management of Temporomandibular Disorders and Evidence-based Lecture and Lab Course for the Physical Therapist

September 22-23, 2007

A two-day introductory to intermediate level course for the PT managing patients with temporomandibular dysfunction. Evidence-based material presented in a lecture and laboratory format. Course participants cover relevant anatomy of the TMJ and cervical spine, biomechanics, pathophysiology, differential diagnostics and imaging techniques.

The PT's role in a team approach with discussion of both non-surgical and post-surgical interventions and rehabilitation will be presented. A discussion of the more common surgical interventions, psychological implications and issues related to PT rehabilitation round out the material.

Cost: \$350, CEUs: 15
Cosponsored with Baptist Hospital
